

Multi-Factor Authentication (MFA)

Setup, Setting Management, and Authentication on Login

Introduction	<p>You have already set up your Multi-Factor Authentication security question.</p> <p>These instructions will guide you through the steps to add the YubiKey method to your Multi-Factor Authentication (MFA) settings.</p> <p>The YubiKey is an additional form of MFA and is a small device that plugs into your workstation USB port. The YubiKey will be the required primary form of authentication but the security question will continue to be available as a backup, should you not have your YubiKey available.</p> <p>After your setup is complete, you will be prompted for this information when you login to Outlook, Teams, and O365 connected apps like Word, Excel, or OneDrive.</p> <p>If you experience issues during setup, please contact someone at support or the helpdesk.</p> <p>If you need assistance, contact the GETS Helpdesk at 877-482-3233</p>
Log In	<div><div><p>Step 1:</p><p>Open a browser and go to https://connect.gets.ga.gov</p><p>If you are not currently logged in:</p><ul style="list-style-type: none">• Enter your username and password• Click Sign In<p>If you are already signed in:</p><ul style="list-style-type: none">• Proceed to Step 2</div><div></div></div>
